

Introducing  
**ENCORE BAGS<sup>®</sup>** by Vipac  
Reusable Packaging for 2010

Everyone loves a free gift, and the environment certainly needs a gift too. So with this in mind, we've designed a new line of packaging with the added benefit of REUSE – a key element in the 3R's of **REDUCE, REUSE, & RECYCLE**.

Vipac's new **ENCORE BAG COLLECTION<sup>®</sup>** not only displays your products to their best advantage, these great bags can be reused again and again – packaging with a second chance that won't end up in the trash. Not a bad idea for a simple bag!

**ENCORE BAGS<sup>®</sup>** come in eco-friendly materials, your choice of colors, and a variety of styles, including: totes, duffles, backpacks, shopping bags, and more. They're strong and attractive – a real fashion accessory.

So when you think of packaging, always think of the environment, and us.

**Our packaging makes all the difference in the world.**
